

## CS 346 Sprint Demo

Team #      \_\_\_\_\_207\_\_\_\_\_      Grade      \_\_\_\_\_20\_\_\_\_\_

Project      \_\_\_\_\_notes application\_\_\_\_\_      Marker      Wen Cui

Sprint #      \_\_\_\_\_2\_\_\_\_\_

Name      Tony Tascioglu      Name      Mrugank Upadhyay

Name      Mihran Mashhud      Name      Joshua Johnson

Eddy Guo (Zoom)

Did they demo from an installed version of the application?    Y    N

Yes

Was there a major goal or theme for this sprint?

File save and user authentication

Was it accomplished?    Y    N

Yes

List completed features, with comments on design/completeness.

a) package and launcher

b) dark and light theme implemented

c) User authentication

d) File save local and on server

e) style for markdown syntax is implemented

What worked well this sprint?

File save and server set up are great work. The markdown syntax is also great idea

What didn't work and what will you change as a team?

Plan for next sprint: Share notes, get light and dark theme work, real time collaboration, custom hotkey

Great work!

## Instructions

The primary purpose of the sprint demo is to provide feedback! Remember that you only have about 15 mins per team.

Use the demo time to review what the team accomplished – reviewing the issues list with them is a great place to start. View each completed feature and provide helpful feedback.

Once the demos are completed, revisit and grade according to the guidelines below.

Please add comments and grade on this sheet. Once complete, scan into a PDF and upload to the SharePoint site.

## Grading

### 1. Sprint kickoff (5)

Review the team's meeting minutes in GitLab.

- (2) Issues are created to address requirements for this sprint - see web site.
- (2) Sprint objectives are identified and discussed.
- (1) Issues are assigned evenly across the team.

### 2. Project Management (5)

Review the project in GitLab, including their repository.

- (2) Issues were logged for the sprint, and closed with details.
- (2) Merge workflow was done for each issue – including reviewers.
- (1) Client installers and release notes exist.

### 3. Feature Demo (10)

Refer to your notes from the demo.

- (5) At least one major feature completed for each person on the team.
- (3) Features were well-designed and worked well together.
- (2) Significant progress was made towards final product.
